## DBT-12 Battery tester

TEXT\_PRODUCTS\_NAMEDBT-12 Battery tester

Manufacturer : -

Catalog No. : -

Battery tester enables safe measurement of voltage, current rating, state of charge and state of health for 12V batteries. The device is powered by an internal battery, so it can test even discharged batteries and can be conveniently used as a voltmeter. Car system test gives you advanced diagnostics of starting and charging systems. Acquired voltage waveforms are presented in a graphical form. The device stores measurement results, marking them with date and time. Internal memory of large capacity provides a record of several hundreds of measurements.

Included PC software allows easy result viewing and report printing using computer printer. The software automatically archives all measurements and provides customer database that can be used to assign measurements to specific customers.

Example report:

The innovation is the voltage recording mode that allows the user to monitor battery voltage for many hours. This can be used for example to detect unwanted enabling of battery draining devices in vehicle or to verify charging process and evaluate battery charger.

Specifications:

Battery type: Standard, AGM/VRLA

Rating norm: EN,SAE,DIN,IEC.

Measurement range: 120 - 1500A (EN)

Voltage measurement: 0 - 25V

Accuracy: 0,5% + 2 counts (voltage)

Power supply: internal Li-ion battery

Operating conditions: 0°C; - 40°C

## DBT-12 Battery tester

Kit content:&nbsp;

DBT-12 device

Measurement cable with alligator clips

Mini USB cable

USB AC Charger

**Price : 779.00EUR**
